GE FANUC VERSAMAX EXACT-MODEL PRODUCT

IC200CHS005

IC200CHS005 is a GE Fanuc VersaMax I/O carrier with horizontal spring-clamp field terminals. It provides the mounting and terminal interface for a compatible VersaMax module. Match the exact carrier, module, conductor preparation, terminal assignments, DIN-rail arrangement, and installed wiring records before replacement.

PRODUCT FAMILY	PRODUCT TYPE
VersaMax Modular I/O	**Horizontal Spring-Clamp I/O Carrier**

Exact model configuration

CONFIGURATION FIELD	VERIFIED VALUE / CHECK
Displayed model	**IC200CHS005**
Manufacturer	**GE Fanuc**
Product family	**VersaMax Modular I/O**
Product type	**Horizontal Spring-Clamp I/O Carrier**
Carrier type	**VersaMax I/O carrier**
Terminal technology	**Spring clamp**
Terminal orientation	**Horizontal style**
Mounting	**DIN rail**
Maximum family wire gauge	**14 AWG**
Protection rating	**IP20 system**
Hot-swap system capability	**Yes, subject to approved procedure**
Application	**VersaMax modular I/O mounting and field termination**
Country of origin	**USA**

Application fit

- Use only with a compatible VersaMax I/O module and the controlled horizontal spring-clamp wiring design.
- Confirm conductor size, strip length, ferrule practice, terminal assignment, commons, shielding, and grounding.
- Preserve service clearance for horizontal wire entry and verify every label before moving conductors.

PRODUCT-SPECIFIC REFERENCE	INSTALLATION NOTE
The Emerson VersaMax carrier selection table identifies IC200CHS005 as the spring-clamp horizontal-style I/O carrier.	Mount on the approved DIN rail, seat the compatible module, transfer labeled conductors one circuit at a time, then verify clamp engagement, continuity, diagnostics, and point operation.

MODEL-SPECIFIC ENGINEERING REFERENCE

Before ordering IC200CHS005

Use this page as a controlled procurement checklist. It does not replace the manufacturer instruction sheet, wiring drawing, approval certificate, or site safety procedure.

Ordering limits and selected values

CONFIGURATION FIELD	VERIFIED VALUE / CHECK
Manufacturer	**GE Fanuc**
Product family	**VersaMax Modular I/O**
Product type	**Horizontal Spring-Clamp I/O Carrier**
Carrier type	**VersaMax I/O carrier**
Terminal technology	**Spring clamp**
Terminal orientation	**Horizontal style**
Mounting	**DIN rail**
Maximum family wire gauge	**14 AWG**
Protection rating	**IP20 system**
Hot-swap system capability	**Yes, subject to approved procedure**
Application	**VersaMax modular I/O mounting and field termination**
Country of origin	**USA**

Procurement checklist

- Capture the IC200CHS005 marking, installed module, slot position, terminal labels, and conductor routing.
- Record every terminal assignment, common, shield, field voltage, wire gauge, and approved ferrule practice.
- Check horizontal entry clearance, strip length, insulation condition, spring action, grounding, and strain relief.
- Inspect the DIN rail, carrier latch, module connector, terminal body, and cabinet environment.
- Commission under change control and verify clamp retention, continuity, diagnostics, and all affected I/O points.

DIRECT SALES INQUIRY

Send the full model **IC200CHS005**, quantity, delivery country, and a clear nameplate or installed-module photo.

Source and document status

Technical basis	Emerson VersaMax Modular I/O and Control data sheet 00813-0100-0112 (June 2020) and applicable GE Fanuc VersaMax documentation in the Emerson knowledge center.
Publisher	Moore Automation - independent industrial automation supplier.
Document status	Independent product manual; not a manufacturer-issued datasheet, conformity certificate, or calibration certificate.
Important	Verify the complete nameplate, suffix, carrier or terminal hardware, wiring, approvals, and installed-system compatibility before ordering.
