# PACSystems\* RX3i and Series 90-30 IC693MDL940 / IC694MDL940

GFK-2704B May 2015

#### Output Module, Relay, NO, 2 Amp, 16 Point

The Series 90\*-30 and PACSystems<sup>\*</sup> MDL940 **2** *Amp Relay* **Output** module provides 16 normally-open relay circuits for controlling output loads. The output switching capacity of each output is 2 Amps. The output points are in four groups of four points each. Each group has a common power output terminal. The relay outputs can control a wide range of load devices, such as: motor starters, solenoids, and indicators. Power for the internal relay circuits is provided by the +24 volt DC bus on the backplane.

Individual numbered LEDs show the ON/OFF status of each output point. There are no fuses on this module. The red bands on the label show that MDL940 is a high-voltage module.

This module can be installed in any I/O slot in a Series 90-30 or RX3i system.

The user must supply the AC or DC power to operate field devices connected to this module.

#### Caution

This module is not compatible with hot swap operations in any backplane. Hot removing or inserting this module into a backplane can cause damage to the module or other system components.

## Specifications

| Rated Voltage  | 24 volts DC, 120/240 VAC (nominal - see the following table for exceptions)   |  |
|--|---|--|
| Operating Voltage  | 5 to 30 volts DC  |  |
|  | 5 to 250 VAC, 50/60 Hz  |  |
| Outputs per Module   | 16 (four groups of four outputs each)   |  |
| Isolation:   |   |  |
| Field to Backplane and to Frame  | 250 VAC continuous;   |  |
| Ground   | 1500 VAC for 1 minute   |  |
| Point to Point   | 250 VAC continuous; 1500 VAC for 1 minute   |  |
| Maximum Load   | 2 Amps pilot duty maximum per output  |  |
|  | 4 Amps maximum per common   |  |
|  | 16 amps maximum per module  |  |
|  |   |  |
| Minimum Load   | 10mA  |  |
| Maximum Inrush   | 5 Amps  |  |
| On Response Time   | 15ms maximum <sup>1</sup>   |  |
| Off Response Time  | 15ms maximum <sup>1</sup>   |  |
| Power Consumption, all   | 7mA from 5 volt bus on backplane  |  |
| outputs on   | 135mA from relay 24V bus on backplane   |  |
| <sup>1</sup> When this module is used wit taken because dropouts in th | h DC power supply IC695PSD040 or PSD140, special precautions should be e source voltage will be seen by this module and may cause relay dropouts. |  |

#### Load Current Limitations: MDL940

Relay contact life, when switching inductive loads, will approach resistive load contact life if suppression circuits are used. The following figures are examples of typical suppression circuits for AC and DC loads. The 1A, 200V diode shown in the DC load suppression circuit is an industry standard 1N4935. The resistor and capacitor shown for AC load suppression are standard components, available from most electronics distributors.

## General Installation Requirements

This product is intended for use with a Series 90-30 or RX3i system. Its components are considered open equipment [having live electrical parts that may be accessible to users] and must be installed in an ultimate enclosure that is manufactured to provide safety. As a minimum, the enclosure shall provide a degree of protection against solid objects up to 12mm (e.g. fingers). This equates to a NEMA/UL Type 1 enclosure or an IP20 rating (IEC60529) providing at least a pollution degree 2 environment.

# Installation in Hazardous Areas

The system containing the MDL940 module must be mounted within an ultimate enclosure that can be accessed only by the use of a tool.

# The following information is for products bearing the UL marking for Hazardous Locations or ATEX marking for explosive atmospheres:

- EQUIPMENT LABELED WITH REFERENCE TO CLASS I, GROUPS A, B, C & D, DIV. 2 HAZARDOUS AREAS IS SUITABLE FOR USE IN CLASS I, DIVISION 2, GROUPS A, B, C, D OR NON-HAZARDOUS AREAS ONLY
- WARNING EXPLOSION HAZARD SUBSTITUTION OF COMPONENTS MAY IMPAIR SUITABILITY FOR CLASS I, DIVISION 2;

- WARNING EXPLOSION HAZARD DO NOT DISCONNECT EQUIPMENT UNLESS POWER HAS BEEN
- SWITCHED OFF OR THE AREA IS KNOWN TO BE NONHAZARDOUS.

### LEDs

Individual numbered LEDs display the ON/OFF status of each output point.

### Module Data

The module receives 16 bits of output data from the host controller CPU. The starting location of this data is selected using the Proficy\* Machine Edition configuration tool.

#### Field Wiring

| Terminal | Connection                      | Module Circuits   | Terminals               |
|----------|---------------------------------|-------------------|-------------------------|
| 1        | Outputs 1 – 4 common (return)   |                   |                         |

| 14       | Output 11                       |                   |                         |
| 15       | Output 12                       |                   |                         |
| 16       | Outputs 13 – 16 common (return) |                   |                         |
| 17       | Output 13                       |                   |                         |
| 18       | Output 14                       |                   |                         |
| 19       | Output 15                       |                   |                         |
| 20       | Output 16                       |                   |                         |
|          |                                 |                   |                         |

Screw terminals accept two copper wires in the range AWG #22 (0.36 mm<sup>2</sup>) to AWG #16 (1.3 mm<sup>2</sup>), or one AWG #14 (2.1 mm<sup>2</sup>) copper 90°C (194°F) wire. Each terminal can accept solid or stranded wires, but the wires into any given terminal must be the same type (both solid or both stranded) and the same size. Screw torque is from 9.6 in-lbs to 11.5 in-lbs (1.1 to1.3 Newton-meters).

# Release History

| Version                     | Date     | Description  |
|-----------------------------|----------|--|
| IC693MDL940N                | May 2015 | Change in fab color from Green to Blue. No change in form-fit-functionality.                                 |
| IC694MDL940E                | Jan 2015 | Updated modules are RoHS converted product with applicable exemptions.                                       |
| IC693MDL940M / IC694MDL940D | Jun 2013 | Hardware update to resolve component obsolescence issue. No changes to features, functions or compatibility. |
| IC693MDL940J / IC694MDL940A | Aug 2008 | Initial release.   |
